

Technical Sales Sheet

Solvitol Aluminium Anti-Seize Spray

Description

Solvitol Aluminium Anti-Seize (HTL) has been specially designed for use during the assembly of threaded or other components where protection against oxidation, corrosion or chemical attack is required both at ambient and high temperatures.

Applications

It can be used on all types of components, including threads, pins, valve stems, etc. and a wide range of materials including austenitic stainless steel. It is particularly useful on aluminium alloy components where other coloured lubricants would leave unsightly marks. Commonly used on the wheel studs where alloy wheels are fitted.

Benefits

- * Prevents seizure.
- * Prevents corrosion.
- * Prevents damaged threads.
- * Assists assembly.
- * Wide temperature range.
- * Resists chemical attack.
- * Easy to apply spray application.
- * Available in a 400ml aerosol.

Technical Data

Appearance	: Silver grey viscous grease.
Contents	: Blend of solvent neutral mineral oil, viscosity improver, acetone, aluminium powder and hydrocarbon propellant.
Temperature range	: -15°C to 1000°C
Water solubility	: Insoluble.
Carrier	: Non-melting grease.
Consistency	: Soft grease

Pack Sizes: -

Aerosol 12 x 400ml box

Directions for Use

Aerosol - Shake can well before use and spray from a distance of 15- 30cm (6 – 12 inches). Invert can and spray to clear valve and nozzle after use.

Caution - Ensure adequate ventilation.
