## Solvitol Moisture Guard Spray

### Description

Solvitol Moisture guard Spray (GMG3) is a thin film product specially designed to provide the ultimate indoor protection against corrosion and pitting. The unique formula also displaces moisture and protects against fingerprint corrosion. It contains a fugitive dye for identification during application.

### Applications

Solvitol Moisture guard can be used on all types of metal components where de-watering and protection against oxidation and rusting is required. It is widely used in the plastic injection moulding industry to protect the die surface during shutdown and storage. When used to protect plastic injection mould tools, experience has shown that in most cases cleaning off is not required since the protective film will be removed with the first few mouldings.

### Benefits

- \* Up to 12 months indoor protection.
- \* Displaces moisture.
- \* Green fugitive dye identifies treated surfaces.
- \* Ultra thin film (3-5 microns).
- \* Suitable for all metals.
- \* Easy to use spray application.
- \* Available in a 400ml aerosol.
